

## **ECE 4554 / 5554 Finding Partners for the Course Project Fall 2022**

Each student should work in a 2-person or 3-person team for the course project. You need to identify partner(s) for your team, enter your information into a Google document, and set up a Canvas Group.

1) You can find a team partner in any way you like. You are not required to post your contact information for all to see. You could use Piazza, for example:

- a) Make a new post where you provide your contact information and possibly suggest a project topic.
  - b) Watch for posts by others, and respond to them.
- 

2) Enter your team's information at [ECE5554 Project Sign-up Sheet](#):

- a) Click the link above to access our spreadsheet.
  - b) Select any row in the spreadsheet, and enter your tentative project title or short topic description.
  - c) On your row of the spreadsheet, enter the names of your team members in the Group Member columns.
  - d) Enter 'Y' in the first column after your team is complete.
- 

3) After you have settled on partners for your team, set up a Canvas Group. The main purpose of these groups is to simplify the process of having one submission from 2 or more students.

- a) Go to the Canvas site for ECE 4554 / 5554.
  - b) Click 'People' on the left.
  - c) Click 'Groups' near the top of the page.
  - d) You will see that many groups have been created in advance, with names like "Project 1", "Project 2", etc. "Self sign-up" has been enabled for each group. Coordinate with your partner(s) to select any one of these groups for your team, and then all partners should join that particular group. The project/group numbers are arbitrary, so just select any number that you like.
